Scholarly Communication Services

The Georgia Tech Library is committed to ensuring the long-term preservation and access to scholarly and research materials produced by members of the Institute. We do this through information resources, tools, educational materials, and training that support Georgia Tech faculty and students in creating, communicating, and maintaining their intellectual output.

**SMARTech Repository**

SMARTech (Scholarly Materials and Research at Georgia Tech) is Georgia Tech's trusted digital repository, established to preserve and provide long-term open access to the research and scholarship produced by members of the institution. SMARTech is home to Georgia Tech research reports, peer-reviewed faculty publications, theses and dissertations, datasets, and recorded lecture series. To submit your materials to SMARTech, please visit [https://smartech.gatech.edu](https://smartech.gatech.edu)

**Open Access Services**

We can help you provide open access to your peer-reviewed scholarly research materials. The Library provides support for:
- Complying with the Georgia Tech Open Access Policy
- Complying with federal funding agency Open Access Policies
- Understanding author rights

For more information, please contact Fred Rascoe, Scholarly Communication Librarian at fred.rascoe@library.gatech.edu, or visit [http://openaccess.gatech.edu/](http://openaccess.gatech.edu/)

**Lecture Recording Service**

We record, preserve, and provide access to campus-based scholarly lectures and research seminars based upon academic research. Scholarly lectures are captured and disseminated widely through the SMARTech Repository. For additional information about this service, please visit [http://library.gatech.edu/services/recording-services.php](http://library.gatech.edu/services/recording-services.php) or contact Katie Gentilello at katie.gentilello@library.gatech.edu

**Research Data Services**

We have tools and resources to help you manage, preserve, and share your research data and other research products. The Library provides support for:
- Complying with federal funding agency requirements for data management
- Publishing or sharing research data and other research sources
- Instruction and training on data management best practices and responsible conduct of research

For more information, please contact Susan Parham, Research Services Librarian, at susan.parham@library.gatech.edu, or visit [https://www.library.gatech.edu/data-management](https://www.library.gatech.edu/data-management)

For more information, please email us at smartech@library.gatech.edu.
