

The Theory Underlying Concept Maps and How to Construct and Use Them

Joseph Novak
Alberto Canas

Goals

- Describe concept maps
 - What are they?
 - Why are they good?
 - How to I build them?
- Structure of human education to use Concept maps

Strong Points

- Simple structure could allow for implementation
- A learning tool which works for people
- System allows for a wide range of knowledge representation
 - Capable of both domain and general representation
 - Can represent itself
- Many examples given

Shortcomings

- Read like an advertisement for CMapTools
